Mooring Compensators

Mooring Compensators

Miccsa offers several designs of innovative Mooring Compensators for mooring boats at marinas.

Miccsa Mooring Compensators are made from high quality EPDM (Ethylene Propylene Diene Monomer) Rubber. Available in 8 different sizes to clutch lines up to 22 mm. Mooring compensators are very easy to fit and provide a simple and economical solution to reduce stressful load on fittings as well as lines.

Part No.	Load in KG	Length	Rope Diameter
MC1501	248	152	11 mm
MC1502	518	218	14 mm
MC1503	809	268	18 mm
MC1504	825	330	18 mm
MC1505	400	385	20 mm
MC1506	300	426	12 mm
MC1507	351	490	18 mm
MC1508	450	565	20 mm

Key Features

- Absorbs tension and relieves sudden tug lines caused by wind or surf
- Provides excellent strength, weather and salt water resistance
- Easy to remove and refit
- Offers optimal locking effect
- Prevents lines slipping without affecting the strength and durability of the line
- Constructed of high quality natural rubber
- Available in bulk and customised packaging
